

Redefining

center
console
excellence

eBook

When Viking Yachts launched Valhalla Boatworks, there was never a doubt about the quality and craftsmanship. They have far exceeded everyone's expectations, and continue to amaze the market with models and features that redefine center console excellence.

The demand for premium center consoles has continued to explode in recent years, and today's discerning buyers have an unprecedented choice of quality vessels to choose from, and Valhalla's are at the top of the list.

Blending the latest innovations and technology, fishability, comfort, and eye-opening performance, the four V-Series models from Valhalla have quickly become known as the elite sportfish line.

Valhalla is Synonymous with World-Class Viking Quality

Created, owned, and operated by the Viking Yacht Company, the legendary builder of the world's finest sportfishing yachts, Valhalla Boatworks is dedicated to building high-performance center consoles, complete with Viking quality, craftsmanship, and expertise. It just doesn't get any better than this.

The boating world knows the Viking Yachts brand is the gold standard when it comes to sportfishing yachts. The design traits of the Valhalla center consoles are derived from world-class Viking convertibles and can be seen throughout all of Valhalla's models. The same commitment to product excellence is built-in to the DNA of each Valhalla model, from design to on-the-water performance, and everything in between.

We're attacking the center console business the same way that we've attacked the sport fishing and motor yacht business – by pushing the envelope to build a better boat every day."

-Patrick Healey, President and CEO

The Valhalla Difference

The same company qualities that make Viking the No. 1 boatbuilder in the world and define “The Viking Difference” also apply to Valhalla Boatworks. The Valhalla Difference means V-Series owners get the same innovation, engineering, performance, and quality that you’ve come to expect from Viking.

A Remarkable Success Story

Fishermen, boat builders, boat owners, and designers acclaimed for their remarkable contributions to the industry have contributed to design and engineering attributes that together make the Valhalla model line the best center consoles the industry has to offer.

PHOTO CREDITS: VALHALLA BOATWORKS

Unique Michael Peters Hull Design

Much of the credit for the exceptional performance of each Valhalla model goes to the patented Michael Peters hull design which incorporates two steps and a centered aft tunnel. This design is meant to increase efficiency in key operating ranges which gives these boats distinct advantages in speed and stability not found in other stepped hull designs. Because some stepped hull boats can get a little squirrely at high speed, the Valhalla design

incorporates vertical sidewall tunnels that help maintain a firm grip on the water. This ventilated tunnel design is a unique feature that results in predictable handling at running speeds. The patented Stepped-V Ventilated Tunnel delivers the softest, driest, and most efficient ride of any center console in this size range.

The first ever V-Series pulled from the mold.

Proud bows, gently sloping S-shaped sheers, double forward chines, helm pods, raised tow rails and mezzanine seating are some of the hallmarks of Valhalla models. No other center consoles manufacturer can match the quality of a Valhalla V-Series boat.

PHOTO CREDITS: VALHALLA BOATWORKS

Valhalla's are virtually unrivaled in their market segment, especially when it comes to visibility, operator ergonomics and aesthetic design. For example, with its significant size, the Valhalla 46 has ample room for two rows of seating under the custom hardtop.

HMY YACHTS PRESENTS

FROM THE

FLYBRIDGE

PODCAST SERIES

Podcast Episode #3 - The Healey Brothers

HMY's podcast "From the Flybridge" hosted by Alexie Creary features brothers Sean and Justin Healey - the third generation of The Viking Yacht Company.

These two young guns are carrying on the family tradition and building a better boat every day at Viking Yachts and Valhalla Boatworks.

As we dive into the company's legacy, let's see what it takes to stay at the top and who they are inside and outside of boat-building.

PLAY 

Versatile Deck Layout

While Valhallas make excellent all-around center consoles with luxurious seating and unmatched creature comforts, their true mission is fishing.

PHOTO CREDITS: VALHALLA BOATWORKS

With plenty of open deck space, the layout of each V-Series model maximizes the boat's 360-degree access with an arsenal of standard and optional features. From stem to stern Valhalla customers will find impressive storage and fishing amenities.

Versatile Deck Layout

The decks are outfitted with large, insulated fish boxes and rod holders can be installed virtually anywhere. Depending on the model, a raised livewell may be integrated into the leaning post or forward lounge, and customers can also opt for an in-deck live well in the cockpit.

Owners can customize their new Valhalla knowing that each option will be meticulously installed with the customer's long-term satisfaction in mind.

Power

Valhalla Boatworks offers outboards in twin, triple, or quad applications, depending on the model. The efficiency of the stepped-hull design combined with the advanced outboard technology provides best-in-class speed, fuel economy, and range. Low engine noise and vibration levels, electronic power steering, and optional joystick helm control systems with GPS station-keeping make operating your V Series an enjoyable, stress-free experience.

V-46

The Mercury 7.6-Litre V12 600-hp Verado remains static, and steering occurs underwater using a steerable gearcase which can pivot up to 45-degrees under joystick operation.

Speed

V-33

The V-33, with twin 400-hp Mercury Verados, has a top end of 64 MPH.

▶ 64 MPH

V-37

The V-37 with triple Mercury Verado 400s, tops out at 70 MPH.

▶ 70 MPH

V-41

The V-41 with quad 450-hp Mercury Verados, tops out at 75 MPH.

▶ 75 MPH

V-46

The V-46 with quad V12 600-hp Mercury Verados reached a top speed of 75 MPH.

INFO COMING SOON

“

Valhalla Boatworks is all about experiencing the best in quality, functionality, serviceability and fishability. You're getting an elite center console from a company dedicated to building a better boat every day.”

-Pat Healey

“

Valhalla Boatworks was established as a dominating force in the center-console market.”

-Justin Healey

Manufacturing In-House

The majority of every Valhalla is designed, and manufactured in-house, resulting in the production of the world's finest high-performance center console yachts. Whether it is an engineered Seakeeper installation, a wiring harness labeled every eight inches, or a resin-infused structural stringer grid, you can be sure of incomparable quality.

Quality Control Advantage

Valhalla has an inherent quality-control advantage because the company manufactures most of the yacht's components in-house. In addition, dedicated personnel thoroughly inspect each Valhalla during the build process. This type of attention to detail ensures greater reliability, safety, and customer satisfaction.

Valhalla Boatworks center consoles, which are all built at Viking Mullica, also go through a Trim boatbuilding stage. Foreman Obed Santiago has a team of 14 installers and one painter.

They install the consoles, seating modules, helm chairs, fish boxes, tackle cabinets, windlasses, anchors and anchor chutes, hardtops and many more vital components.

PHOTO CREDITS: VALHALLA BOATWORKS

“It’s all about quality and attention to detail,” says Obed, a 23-year Viking veteran. “Everything we touch must be done to the highest of standards. Every screw counts.”

Vertical Integration

Viking and Valhalla have two sister companies that make their world-class manufacturing and customer service even better.

Palm Beach Towers designs and crafts the finest aluminum tuna towers, custom railings, fiberglass hardtops, drop-down electronic boxes, flush-mounted electric teaser reels, and a host of other specialized items.

Atlantic Marine Electronics is the premier source for Viking installed navigation, communication, and entertainment equipment. Valhalla Boatworks will be utilizing PBT for the V-41 gap towers, and custom electronics installations can be done by Atlantic Marine Electronics.

HMY's presence in the industry as a top Viking dealer has earned us the respect with our clients looking for a premium center console like Valhalla.

When we tell our clients about Valhalla's commitment to quality, performance, fishability, and innovation, it quickly becomes a no-brainer because there is no other center console that even comes close."
